

# Construction Moratorium

A general construction moratorium is imposed from the Fall to the Spring seasons. Exact dates are set each year by the Village Council but Village Code prohibits construction before April 1st.

It is the responsibility of the property owner, their contractors and agents to be aware of the exact dates and to plan accordingly.

The Moratorium includes but is not limited to utilities, streets, sodding, heavy landscaping, pruning with a chain saw, and the use of heavy equipment or the production of loud noises is prohibited, except to the extent that such construction activity is deemed necessary for emergency repair in the interest of health and safety, and approved by the Village Manager.

**Contact Village Hall for the current moratorium dates**
